TEUTON WOMEN  
ON FIRING LINE

CONCLUSIVE PROOF OF THE EX-  
HAUSTION OF MAN POWER  
FOR ARMY

(By Associated Press.)  
PETROGRAD, July 28.—When the Russian women's battalion went into action against the Germans near Smorgen on July 25, they captured a number of women from whom they learned the first time that German women also are fighting in western Russia.

Ten wounded of the women's battalion arrived today leaving their commander Vera Butchwareff and Marya Skrydloff, daughter of the Admiral and former commander of the Baltic Fleet in the hospital at Vitebsk. Of 200 who went into action only 50 were left. Twenty were killed, eight made prisoners, and the remainder wounded.

"We did not feel the slightest fear. We were amazed to find while replying to the enemy's severe fire that our men comrades in neighboring trenches had treacherously fled leaving us, a handful of women to fight the enemy."

CONGREGATION  
GREET PASTOR

MEMBERS OF PRESBYTERIAN  
CHURCH PRESENT KEEP-  
SAKE TO PASTOR

The congregation of the Presbyterian church held a reception last evening to take farewell of their pastor and his wife and family who leave Monday morning for their new home in Sacramento. The church was beautifully decorated with colored lamps and a nice programme of vocal and instrumental music was arranged. During the evening a set of resolutions expressing the deep admiration of the congregation was read and at the conclusion Mrs. John Nicol presented the pastor and his wife with a souvenir in the shape of a silver tray. After the entertainment and exchange of compliments the entire party enjoyed a substantial luncheon prepared by the ladies of the church.

NEW SOUBRIQUET

(By Associated Press.)  
PARIS, July 28.—The American soldiers have chosen their own soubriquet. They adopted "Amexes" as a combination of the first two letters of the words "American Expedition" similar to "Anzac" adopted by the Australian and New Zealand troops.

TO REPRESS  
RIOTERS IN  
PETROGRAD

IRON HAND OF KERENSKY A-  
GAINING CONTROL OF THE  
NATION

(By Associated Press.)  
LONDON, July 28.—Petrograd despatches dealing with the military and political situation colour in the statement that Petrograd itself is outwardly calmer than for two months, which is attributed to Kerensky's strong repressive measures, including the disarming of rioters and mutineers. It is reported that Madame Kollontae was among the extremists arrested. The whole internal situation shows signs of improvement. It is generally recognized that domestic problems must await the end of the war.

QUICKNESS OF THE NEW TROOPS  
IN BOMB THROWING PRACTICE  
ACQUIRED BY BASEBALL TRAINING

(By Associated Press.)  
AN EUROPEAN PORT, July 28.—Another American contingent has safely arrived and disembarked.

Kermif Roosevelt, wife, and child sailed on the same steamer. The men were in high spirits and shouted "Are we downhearted?" and answered "with a roaring 'No'." Representatives of the general staff watched the disembarkation. There was no civic demonstration and only a

few spectators who cheered. The men entrained quickly for the department's new quarters.

The regular officers are pleased with the work and efficiency of the young officers, the products of Plattsburg and other training camps. They declare the quality of these men sets at rest any doubt of the high standard of leadership for the American armies. The French are amazed at the proficiency of Ameri-

cans at bomb hurling, due to their baseball experience.

The opinion of most officers is that officers from the training camps will be sent to France at the earliest possible moment, fitted for the war zone to act as instructors to troops when they arrive. It is now planned to take both officers and men in detachments to the fighting front so they may see and study actual conditions to be met.

NEXT BIG METAL BOOM WILL BE  
IN SILVER PRODUCING MINES

"The next big move upward is coming in silver" says Hamilton B. Will's market despatch from Toronto and New York.

"The market is shaping itself this way and financiers who rarely pay serious attention to anything outside of the railroad or industrial securities on the New York Stock Exchange are, and have been for weeks past, investing largely in the silver issues. I think it is a most conservative statement to make: More influential interests now hold a large stock-ownership in the Cobalt and Tonopah producing companies than ever before. There is good reason for this from an earning, as well as a profit distributing point of view and as both factors at all times dominate market values, a very substantial advance would appear practically assured.

"In spite of the advancing cost of materials used in silver mining, the prevailing high prices of this product has not only overcome this but net profits per ounce today are greater than for years before Cobalt was discovered. Prior to the war overhead costs of mining, milling and smelting ranged from 15 to 22 cents per ounce. At that time silver ranged in price

from 50 to 55 cents per ounce. In other words, at that time, net profits ranged from 50 per cent to over 500 per cent higher than at present. I think it is a fair estimate to place current overhead expenses of silver mining at around 28 to 35 cents per ounce whereas, the metal is being sold in the open market, with more buyers than ever before, from 80 to 84 1/2 cents per ounce. These cost figures, while not official, have been given me by reliable mining men and simply bring out what I have diligently contended for weeks and months past.

"The above figures go to show a net profit ranging between 49 to 55 cents is being obtained today on every ounce of silver produced. True, the output is slightly smaller but the gross values bring the figures nearly to a par with the high records established in the palmy days of a few years ago. Again I point out, stock market values of today are from 50 per cent to 500 per cent lower than when company earnings were based on around 32 cents per ounce, and if this factor has any bearing for the marketwise, as it undoubtedly must have, I contend, insofar as the successful and opportune investment of money.

"The situation in the silver market is unparalleled in history. The outlook for silver going much higher in price is clearly visible and once more company earnings will receive another substantial boost. Are you fully aware of this situation? Are you prepared to 'take down' your share of the anticipated warranted market profits in the silver issues? Our chief dependence from a patriotic viewpoint must be in the mines, and as sure as guns are made of iron, the speculator and investor can find nothing surer to put his money into than the stocks representing the silver producing properties."

SWITCHMEN ARE  
OUT ON A STRIKE

ALL TRANSCONTINENTAL TRAF-  
FIC WILL BE DELAYED BY  
TROUBLE

(By Associated Press.)  
CHICAGO, July 28.—The strike of switchmen became effective at six o'clock this morning on nineteen railroads entering here.

The dispute leading to the strike is declared by the railroads as equivalent to establishing the closed shop against the switchmen not members of the Brotherhood of Railroad Trainmen. Police reserves are ready in case of trouble. Federal authorities are closely watching the situation and will take immediate action in the event government war supplies are detained or destroyed.

Although the strike technically is local, it will have national scope to the extent that it may delay traffic of all transcontinental lines passing through here.

The switchmen refused to submit their case to federal mediation.
